

# FLONIDAN factsheet

FLONIDAN develops, manufactures and sells innovative metering solutions. We are among the world market leaders in smart gas meters and an important provider of data communication components to water, electricity, heat and gas meters.

## Accurate Metering and Billing

Our solutions are employed by professionals in public and private energy companies to ensure accurate metering and billing. We offer a complete range of smart gas diaphragm meters plus a new ultrasonic gas meter, SciFlo®, which excels both in range and size.

## Certified Quality

Knowledge, innovation and relation building are the keystones of our success. We have almost 40 % of our employees engaged in R&D and quality assurance. We carry both the ISO 27001 information security certification as well as the ISO 9001 quality certification.

## Global and Sustainable Business

To keep an agile and lean organization the main production of smart gas meters is outsourced. From our headquarters in Denmark we monitor the entire supply chain, from selection of raw materials to logistics and service. Since 2015 most of our smart gas meters comply with FAIR, a set of re-quirements aiming to implement transparency throughout the supply chain.

In past years FLONIDAN has experienced a strong and rapid growth, following the European roll-out of smart meters and enabled through strategic partnerships.

## Strong Ownership

Founded in 1982 in Denmark FLONIDAN is 100% owned by AVK Group, a privately owned industrial group comprising 80+ companies and 3.400 employees.
